

# FUNGI • FILLED FERTILISER

• Care for soils today • Care for crops for life •

## • PRODUCT OVERVIEW •

Re-Genus Fungi-Filled Fertiliser is an all-natural fertiliser enriched with our hugely diverse blend of beneficial fungi. Designed to kick-start natural nutrient cycling, we can deliver crop support with a 99% lower CO<sub>2</sub> footprint and significantly lower input. The product contains a range of macro and micro nutrients, all sourced from natural and organic-approved sources. It's ideal for use in a wide range of crops over-winter to build soil health and resilience. It can be paired with our *Natural N fertiliser* in spring to reduce or replace synthetic fertiliser to enable your journey towards more regenerative farming in a natural system.

## • KEY FEATURES •

**Diverse UK Soil Fungi:** Contains a hugely diverse blend fungi and soil microbiota to provide crops with their natural allies for accessing nutrition and water.

**Organic Source Approved:** The product is on the Soil Association's list of source-approved inputs for Organic Agriculture.

**All-Natural Ingredients:** Made with natural and sustainable materials, safe for plants, soil, and the environment.

**Versatile Application:** 6mm pellets can be applied through direct seed drills, fertiliser or trailed spreaders, and drones.

## • NUTRITION INFORMATION •

Our farmers use 95% less N over winter and 50% less N across the growing season as we restore the soil microbiome & symbiosis with the crop. The N source that we add is held within the soil and mineralised gradually, rather than lost to the wider environment.

	N	P	K	Ca	Mg	S	Na
Nutrition Values	0.69%	0.17%	0.42%	1.09%	0.07%	0.32%	0.03%
	Cu	Zn	Mn	B	Fe	Mo	
	0.71 mg/kg	4.07 mg/kg	12.97 mg/kg	0.49 mg/kg	618.5 mg/kg	0.05 mg/kg	

• ABOUT RE•GENUS •

At Re-Genus we're on a mission to replace 1% of the global synthetic fertilisers, mitigate the 30 million tons of carbon emissions per year and restore soils for the health of crops, people and nature. We've run successful trials with a number of big name farms and estates which are demonstrating the power of our product to support a transition to regenerative farming and create huge scope 3 emissions reductions for you and your customers.

OUR PROMISES:

- Zero Synthetic Chemicals
- Approved for use on Organic Agriculture
- Save Five Tonnes of Carbon per Tonne of Natural Fertiliser\*
