

• NATURAL N • FERTILISER

• Natural Fertiliser That Works • For Growers • For Nature • For Climate •

• PRODUCT OVERVIEW •

Re-Genus Natural N Fertiliser is an all-natural fertiliser, approved for use in Organic systems. It is designed to support a wide range of plants, trees and turf. It not only feeds your plants but also feeds the soil microbiome, to provide longer lasting support to plants.

We use natural sources of NPK which are more complex, less soluble and therefore less likely to wash away - giving your plants access to more of the nutrition you pay for. The product contains a range of macro and micro nutrients and trace elements. It's ideal for use on a wide range of plants and trees to reduce or replace the use of synthetic fertilisers.

We deliver plant and crop support with 99% less CO₂ than synthetic fertiliser - saving 5 tonnes of carbon per tonne of fertiliser used (versus the use of synthetics).

• KEY FEATURES •

Organic Source Approved: The product is on the Soil Association's list of approved inputs for organic growing systems.

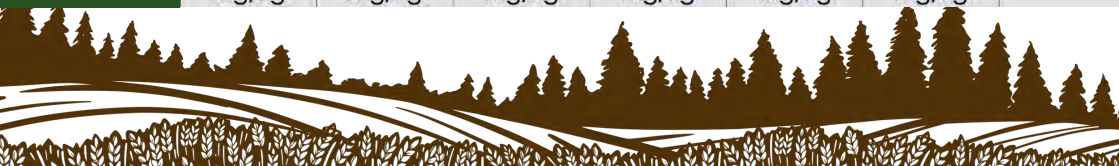

All-Natural Ingredients: Made with natural and sustainable materials, safe for plants, soil, and the environment.

Versatile Application: 6mm pellets can be applied by hand or through a range of fertiliser spreaders and we've even spread it through drones for bigger, harder to reach projects.

• NUTRITION INFORMATION •

Our fertiliser contains much less N than synthetic alternatives because what we add is held within the soil, so less is washed away. By working with nature we also feed the beneficial soil microbes which unlock the nutrients already present in the soil. We feed plants the way nature intended.

Nutrition Values	N	P	K	Ca	Mg	S	Na
	5.91%	3.07%	0.44%	10.53%	0.11%	0.37%	0.22%
	Cu	Zn	Mn	B	Fe	Mo	
	2.18 mg/kg	36.65 mg/kg	9.47 mg/kg	5 mg/kg	521.63 mg/kg	0.7 mg/kg	

• ABOUT RE • GENUS •

At Re-Genus we're on a mission to replace 1% of the global synthetic fertilisers to mitigate 30 million tons of carbon emissions per year and restore soils for the health of crops, people and nature. We've run successful trials with a number of big name farms and estates and have grown a wide range of plants, trees and crops. Our promises:

- Zero Synthetic Chemicals
- Approved for use on Organic Agriculture
- Save Five Tonnes of Carbon per Tonne of Natural Fertiliser*

*vs use of synthetic fertiliser
